

## RETROFIT • AP Series

# VFD Drive Upgrade

## Increase your palletizer's uptime

The VFD drive has been updated from the Siemens drives to Allen Bradley. The VFD drive includes the twin belt turner, the layer former and row pusher as well as the elevator.

### Retrofit Main Benefits:

- ✓ Minimized downtime
- ✓ Optimized equipment
- ✓ Updated drives

## VFD Drive Upgrade

### Minimized Downtime

The updated Allen Bradley drives replace the now obsolete Siemens drives, which could break down and result in long and unwanted downtime for your palletizer.

### Optimized Equipment

The new VFD parameters are up to date and optimize the equipment's movements, providing you with the best version of your palletizer.

### Latest Generation of Drives

The new VFD retrofit allows you to benefit from the latest generation of Allen Bradley drives and ensure you maximize your equipment's uptime.
