Fan Kits Retrofit

Upgrade your palletizer

The J1, J2 and J3 fan kits are available for robotic palletizer's to continuously cool down your Fanuc robot.

Retrofit Main Benefits:

- ✓ Increased capabilities
- ✓ Reduced maintenance

Increased Capabilities

The fan kit retrofits are installed to keep your robot servo motors at an ideal temperature. This upgrade is often installed when production levels go up and the robot's capacity is increased as well as when the ambient temperature is higher than expected.

Reduced Maintenance

The new retrofit continuously keeps your robot servo motors at an ideal temperature, reducing overheating and down time caused by overheating servo mortors.
