

## RETROFIT • AR Series

# Pivot Brackets Retrofit

## Increase your palletizer's longevity

This new retrofit replaces the finger and side plates arm support of current Finger Grippers.

### Retrofit Main Benefits:

- ✓ Increased lifetime of components
- ✓ Better fluidity
- ✓ Reduced maintenance

## Pivot Brackets Upgrade

### Prolonged Component Lifetime

The pivot brackets retrofit fixes the loose bolt and broken part on the finger and side plates arm support, increasing the lifetime of the components.

### Better Fluidity

The new finger and side plates arm support ultimately provides better flow control for smoother movement.

### Reduced Maintenance

The new retrofit supports are provided with a welded steel attachment that reinforces the critical area near the cylinder.
