

RETROFIT • FFS-200

Adjustable Filling Chute

Increase productivity of your FFS equipment

The single auto adjustable filling chute replaces up to three filling chutes, for any bag sizes from 16 to 24 in. (empty bag width dimensions).

Replacement main benefits

- ✓ Increased productivity
- ✓ Rapid changeover
- ✓ Increased employee safety

Adjustable Filling Chute

Reduced Bag Changeover Time

The bag size selection is done through a selector, which commands the auto adjustment of the bag within a second. This simplifies and significantly reduces bag size changeover time.

Cleaner Process

This chute has integrated dust collecting ports, which are designed for clean operation and best top seal integrity.

Quick Changeover

The adjustable filling chute retrofit does not require any electrical modifications. This retrofit ultimately increases your equipment's productivity and employee safety.
