Outfeed Conveyor Height Adjustment System #80

Faster and simpler bag changeover changeover

This upgrade replaces the manual lever with a hydraulic system that is controlled via remote. The assembly can be bolted directly onto the conveyor.

Replacement main benefits

- ✓ Faster Bag Changeover
- ✓ Quick and Easy Installation
- ✓ Low Maintenance

New Outfeed Conveyor Height Adjustment System Retrofit

Faster Bag Changeover

In this new system, the manual lever is replaced by a rugged and reliable hydraulic device that can easily be moved up and down using a small remote control. This allows for quicker bag changeover and increased output.

Simple Installation

This system only requires 120V for installation, meaning minimal set-up costs.

Low Maintenance

The design includes low maintenance components which translate into an increase in the long-term reliability of your machine.
