

RETROFIT • PTH Series

Bag Placer Reinforced Part

Improve part longevity of your bagging equipment

The new part upgrade is thicker and bigger to improve overall durability and longevity.

Retrofit Main Benefits:

- ✓ Easy to replace
- ✓ Improved longevity
- ✓ Sturdy design

Bag Placer Reinforced Part

Improved Performance

The reinforced bag placer part is sturdier, which improves durability and reduces fatigue breakage.

Quick Changeover

The new reinforced part is easy to replace, allowing you to quickly change to the sturdier design and be up and running shortly.

Better Design

The four top linkages are now made from 0.375" material and the shaft for the spacer is now 0.625" square rather than 0.500" square.
