

RETROFIT • PTH Series

New Tooling Retrofit

Improve your bagging equipment

The new tooling retrofit design is equipped with the Bosh Linear guiding upgrade.

Retrofit Main Benefits:

- ✓ Improved longevity
- ✓ Reduced maintenance
- ✓ Easy to adjust

New Tooling Upgrade

Lightweight Tooling

The retrofit's new tooling design is lighter in weight, which reduces the robot payload.

Reduced Maintenance

The Bosh Linear bearing has improved longevity, reducing the need to regularly change or maintain the tooling.

Quick Changeover

The new tooling retrofit is easy to adjust and could be retrofitted on the LR Mate 200iC and the 200iD Robot. It only has the possibility of being automatically adjusted to the LR Mate 200iD Robot.
