# Bag Placer Retrofit

## Upgrade your bagging equipment

The new bag placer with flange bearings is a complete module replacement equipped with the latest design.

### Retrofit Main Benefits:

- ✓ New design
- ✓ Upgraded module
- ✓ Reduced maintenance

## Bag Placer Upgrade

### Better Design

This latest design no longer contains any spherical bearings on the arm's shoulder pivots; it has been replaced with flange bearings.

### Improved Module

The new upgrade's gripper mechanism has been simplified with an air cylinder and all pivot ends have been improved.

### Reduced Maintenance

The simplified design of the bag placer upgrade reduces overall maintenance time.
