

Seamless Onboarding with Online Training

Address staff turnover proactively with our online training program, designed to empower your new team members with the skills they need to succeed. In an industry where high turnover rates are common, ensuring standardized and comprehensive training for every new hire is critical. Our plug-and-play solution emphasizes workplace safety around equipment, enhances operational efficiency, and equips your team to maintain consistent production while minimizing disruptions from day one.

Program Summary

Delivery method

Online

Access

Unlimited access with annual licenses

Duration

90 minutes per equipment

Program Purpose

Key objectives

- Identify the steps of operating procedures
- Use the equipment safely
- Identifying common issues

Easy online access

- Immediate access to essential training materials for operating Premier Tech's packaging equipment
- Ready-to-use content tailored for seamless integration into your onboarding process
- Simplifies the learning for new team members

Comprehensive training resources

- Unlimited access to training content and procedures through annual licenses
- Printable cheat sheets for on-the-job reference
- Training content available in English, Spanish and French to support your team members in their preferred language

Learning Modules

This online onboarding training takes approximately 90 minutes per piece of equipment to complete. It is self-paced, allowing operators to progress at their own convenience. Each module includes theoretical content presented through short readings and videos, followed by brief quizzes at the end to reinforce content retention. A cheat sheet can be printed and brought to the equipment, assisting operators with their learning on-site.

List of learning modules

- Equipment modules and operating cycle
- Safety devices
- Operating controls
- Operating procedures
- Settings and adjustments
- Cleaning and daily visual checks
- Alarms management essentials
- Most common issues
