## SpeedAC iQ Retrofit

### Improve efficiency of your weighing system

The new SpeedAC iQ controller for net, gross and in-process weighing systems is the most accurate, robust and user-friendly controller on the market.

#### Retrofit Main Benefits:

- ✓ Better efficiency
- ✓ Helpful analytics
- ✓ User-friendly

### SpeedAC iQ Upgrade

#### Better Efficiency

The SpeedAC iQ is a top performing controller when it comes to speed, accuracy, and standard deviation. With auto tune, the new 'Smart Feed' algorithm, and preloaded programming, it allows complete control of the filling process with unprecedented efficiency and ease.

#### Convenient Data Analysis

The retrofit's operation is carried out via a large touchscreen graphic display, which provides live performance feedback, statistical data, fine-tuning functions, information on system status and much more.

#### Intuitive Design

The new SpeedAC iQ offers the latest weight-embedded controller technology with intuitive navigation menus, improving user experience overall. It is easy to configure and integrate as well as retrofit from previous generations of controllers.
