

EMPOWERING CONNECTION

Assess your Premier Tech equipment performance and adjust operations for optimal results with integrated Necton™ technology. Gain actionable insights to enhance operational efficiency directly from your dedicated Client Portal.

Necton™ connects to your Premier Tech packaging equipment to monitor its health in real-time. It tracks trends continuously and helps prevent downtime, ultimately maximizing production and business success.

PERSONALIZED INSIGHTS

Available through your Client Portal, you can select your equipment and view data such as:

- Production overview
- Frequent alarms
- Uptime

KEY BENEFITS

Increased Performance

Monitor your production performance from anywhere at a glance

Improved Efficiency

Quickly understand equipment status patterns and identify improvement opportunities

Effective Troubleshooting

Easily pinpoint the root causes of frequent alarms to fix recurring problems

AN OUT-OF-THE-BOX SOLUTION TO PROACTIVELY IMPROVE YOUR PACKAGING PERFORMANCE

Be up and running in less than a day with Necton™. With the support of our field technicians and the Plug & Play Edge device, you can count on a swift and reliable start.

With standalone hardware, encrypted connections and transparent data agreements, your privacy is safeguarded. Once Necton™ is connected to your equipment and Internet, simply log into your Client Portal to assess your performance.

- Fully automatic - no operator input required
- IT-Ready with automatic updates
- Accessible from anywhere, web-based with unlimited users
