for 60 kg Jute Bags**

CHRONOS • OMJ-1060-Z

Coffee Grain Bagging Machine for 60 kg Jute Bags

UP TO 28.8 TONS PER HOUR*

*Depending on product type, stacking pattern, and machine configuration

Cost efficiency

Cuts operating costs and labor risks with fast ROI.

Versatility

Scalable to full line automation (bagger + palletizer).

Ease of Use

Automates standard jute bags – no redesign needed.

The OMJ-1060-Z delivers reliable, data-enabled performance and a fast payback, helping coffee producers and cooperatives scale sustainably.

Bulk Materials

Green coffee beans

Applications

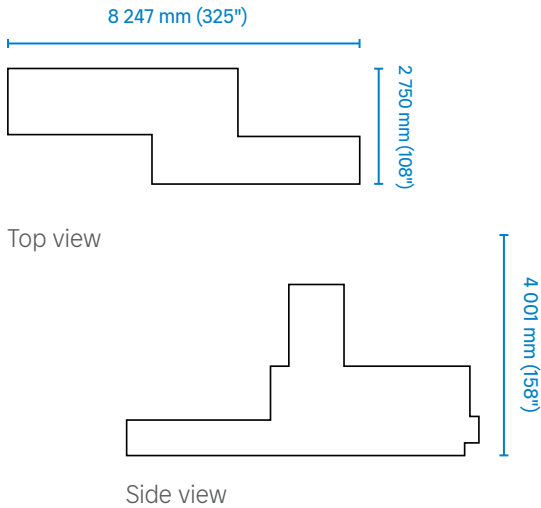

60 kg standard
jute bags

Brazil is the world's largest coffee producer, yet most 60 kg jute bagging is still manual – this solution bridges tradition and automation without changing the iconic jute bag.

Typical Equipment Dimensions

Features

Designed specifically for unmodified jute bags

Seamless integration with SpeedAC iQ net weigher

Rugged handling for rough texture/low-stiffness bags

Higher throughput vs. manual operations

Necton-ready for data collection and performance analysis

Reliable Premier Tech platform (OML-1060 heritage)

Options

Full line integration: palletizers and end-of-line automation

Remote assistance and diagnostics

Spare parts kits and preventive maintenance packages

Training packages: on-site and virtual (operators/maintenance)

Specifications

Bag specifications

60 kg jute (standard; no modification required)

Throughput: 28.8 tons per hour

Accuracy: ± 0.1 % of the pack weight*
(*depends on product characteristics)

Product handled

Green coffee beans (others on request)

Weighing system

SpeedAC iQ net weigher

Electrical requirements

3Phase 380-480 V AC, 50/60 Hz, PE

Control system

Industrial PLC/HMI, remote support capable

Connectivity

Necton data monitoring compatibility

Safety

CE / NR-12 (confirm per region)

Client Solutions

Partner in your success

Our partnership doesn't end with the installation of your equipment. Through our Client Solutions team, we work to maximize the performance and longevity of your packaging systems, ensuring continuous success for your operations.

Start off strong with your new equipment by opting for a maintenance plan and specialized technical training. Plus, take advantage of our complimentary 24/7 Help Desk and Client Portal, giving you instant access to expert support and resources whenever you need them.
